Ordered to lie on the table and to be printed

AMENDMENT intended to be proposed by __________

Viz:

1. In lieu of the matter proposed to be inserted, insert

2. the following:

3. **SECTION 1. SHORT TITLE.**

4. This Act may be cited as the “__________ Act of

5. 2006”.

6. **SEC. 2. FINDINGS.**

7. Congress finds the following:

8. (1) After the terrorist attacks of September 11, 2001, President Bush authorized the National Secu-

9. rity Agency to intercept communications between
people inside the United States, including American
citizens, and terrorism suspects overseas.

(2) One of the lessons learned from September
11, 2001, is that the enemies who seek to greatly
harm and terrorize our Nation utilize technologies
and techniques that defy conventional law enforce-
ment practices.

(3) For days before September 11, 2001, the
Federal Bureau of Investigation suspected that con-
fessed terrorist Zacarias Moussaoui was planning to
hijack a commercial plane. The Federal Bureau of
Investigation, however, could not meet the require-
ments to obtain a traditional criminal warrant or an
order under the Foreign Intelligence Surveillance
Act of 1978 to search his laptop computer (Report
of the 9/11 Commission 273–76).

(4) The President, as the constitutional officer
most directly responsible for protecting the United
States from attack, requires the ability and means
to detect and track an enemy that can master and
exploit modern technology.

(5) It is equally essential, however, that in pro-
tecting the United States against our enemies, the
President does not compromise the very civil lib-
erties that he seeks to safeguard. As Justice Hugo
Black observed, “The President’s power, if any, to issue [an] order must stem either from an Act of Congress or from the Constitution itself.” Youngstown Sheet & Tube Co. v. Sawyer, 343 U.S. 579, 585 (1952) (opinion by Black, J.). Similarly, in 2004, Justice Sandra Day O’Connor explained in her plurality opinion for the Supreme Court in Hamdi v. Rumsfeld: “We have long since made clear that a state of war is not a blank check for the President when it comes to the rights of the Nation’s citizens.” Hamdi v. Rumsfeld, 542 U.S. 507, 536 (2004) (citations omitted).

(6) When deciding issues of national security, it is in our Nation’s best interest that, to the extent feasible, all 3 branches of the Federal Government should be involved. This helps guarantee that electronic surveillance programs do not infringe on the constitutional rights of Americans, while at the same time ensuring that the President has all the powers and means necessary to detect and track our enemies and protect our Nation from attack.

(7) As Justice Sandra Day O’Connor explained in her plurality opinion for the Supreme Court in Hamdi v. Rumsfeld, “Whatever power the United States Constitution envisions for the Executive in its
exchanges with other nations or with enemy organi-
izations in times of conflict, it most assuredly envi-
sions a role for all 3 branches when individual lib-
erties are at stake.” Hamdi v. Rumsfeld, 542 U.S.

(8) Similarly, Justice Jackson famously ex-
plained in his Youngstown concurrence: “When the
President acts pursuant to an express or implied au-
thorization of Congress, his authority is at its max-
imum, for it includes all that he possesses in his own
right plus all that Congress can delegate... When the
President acts in absence of either a congressional
grant or denial of authority, he can only rely upon
his own independent powers, but there is a zone of
twilight in which he and Congress may have concur-
rent authority, or in which its distribution is uncer-
tain. Therefore, congressional inertia, indifference or
quiescence may sometimes, at least as a practical
matter, enable, if not invite, measures on inde-
dependent presidential responsibility... When the Presi-
dent takes measures incompatible with the expressed
or implied will of Congress, his power is at its lowest
ebb, for then he can rely only upon his own constitu-
tional powers minus any constitutional powers of
Congress over the matter. Courts can sustain exclu-
sive Presidential control in such a case only by dis-
abling the Congress from acting upon the subject.”
Youngstown Sheet & Tube Co. v. Sawyer, 343 U.S.
579, 635–38 (1952) (Jackson, J., concurring).

(9) Congress clearly has the authority to enact
legislation with respect to electronic surveillance pro-
grams. The Constitution provides Congress with
broad powers of oversight over national security and
foreign policy, under article I, section 8 of the Con-
stitution of the United States, which confers on Con-
gress numerous powers, including the powers—

(A) “To declare War, grant Letters of
Marque and Reprisal, and make Rules con-
cerning Captures on Land and Water”;

(B) “To raise and support Armies”;

(C) “To provide and maintain a Navy”;

(D) “To make Rules for the Government
and Regulation of the land and naval Forces”;

(E) “To provide for calling forth the Mili-
tia to execute the Laws of the Union, suppress
Insurrections and repel Invasions”; and

(F) “To provide for organizing, arming,
and disciplining the Militia, and for governing
such Part of them as may be employed in the
Service of the United States”.
(10) While Attorney General Alberto Gonzales explained that the executive branch reviews the electronic surveillance program of the National Security Agency every 45 days to ensure that the program is not overly broad, it is the belief of Congress that approval and supervision of electronic surveillance programs should be conducted outside of the executive branch, by the article III court established under section 103 of the Foreign Intelligence Surveillance Act of 1978 (50 U.S.C. 1803). It is also the belief of Congress that it is appropriate for an article III court to pass upon the constitutionality of electronic surveillance programs that may implicate the rights of Americans.

(11) The Foreign Intelligence Surveillance Court is the proper court to approve and supervise classified electronic surveillance programs because it is adept at maintaining the secrecy with which it was charged and it possesses the requisite expertise and discretion for adjudicating sensitive issues of national security.

(12) In 1975, [then] Attorney General Edward Levi, a strong defender of executive authority, testified that in times of conflict, the President needs the power to conduct long-range electronic surveillance.
and that a foreign intelligence surveillance court should be empowered to issue special approval orders in these circumstances.

(13) The Foreign Intelligence Surveillance Act of 1978 clarifies and definitively establishes that the Foreign Intelligence Surveillance Court has the authority to review electronic surveillance programs and pass upon their constitutionality. Such authority is consistent with well-established, longstanding practices.

(14) The Foreign Intelligence Surveillance Court already has broad authority to approve surveillance of members of international conspiracies, in addition to granting warrants for surveillance of a particular individual under sections 104, 105, and 402 of the Foreign Intelligence Surveillance Act of 1978 (50 U.S.C. 1804, 1805, and 1842).

(15) Prosecutors have significant flexibility in investigating domestic conspiracy cases. Courts have held that flexible warrants comply with the 4th amendment to the Constitution of the United States when they relate to complex, far-reaching, and multifaceted criminal enterprises like drug conspiracies and money laundering rings. The courts recognize that applications for search warrants must be
judged in a common sense and realistic fashion, and
the courts permit broad warrant language where,
due to the nature and circumstances of the inves-
tigation and the criminal organization, more precise
descriptions are not feasible.

(16) Federal agents investigating international
terrorism by foreign enemies are entitled to tools at
least as broad as those used by law enforcement offi-
cers investigating domestic crimes by United States
citizens. The Supreme Court, in the “Keith Case”,
United States v. United States District Court for
the Eastern District of Michigan, 407 U.S. 297
(1972), recognized that the standards and proce-
dures used to fight ordinary crime may not be appli-
cable to cases involving national security. The Court
recognized that national “security surveillance may
involve different policy and practical considerations
from the surveillance of ordinary crime” and that
courts should be more flexible in issuing warrants in
national security cases. United States v. United
States District Court for the Eastern District of

(17) By authorizing the Foreign Intelligence
Surveillance Court to review electronic surveillance
programs, Congress preserves the ability of the
President to use the necessary means to guard our national security, while also protecting the civil liberties and constitutional rights that we cherish.
